

GEDORE

TOOLS FOR LIFE

formerly TORQUELEADER

LOW VOLTAGE INSULATED TORQUE WRENCHES

DATA SHEET: 018

Issue No: 3

DATE: 04/16

No of Pages: 2

OVERVIEW

Gedore Torque have produced an additional range of products to cover lower voltage battery back up type systems (below 50v).

GENERAL ARRANGEMENT

The tools available in this range use a combination of PVC and non conductive plastic hand grips, PVC ratchet covers and, where applicable, double PVC heat shrunk barrel insulation to provide protection against low voltage shorting.

ACCURACY

All tools are designed and manufactured to meet the accuracy and repeatability requirements of ISO 6789 :2003.

LOW VOLTAGE INSULATION

The protection afforded by the PVC heat shrink and plastic handle grips is considered adequate for use on electrical systems up to 50v. Users should take precautions against physically damaging the insulation and inspect tools regularly.

It should be noted that the insulating properties of these tools do not comply with any national or International Standards or Specifications.
